My name is amr abd elaziz i am a 26 years old UX & UI designer that lives in Egypt. I have over 9 years of experience in creating cool design for awesome people around the world. Lately, I've been concentrating my attention on user experience & user interface design for web and mobile and tablets but I really enjoy to create other designs as well (graphic design, brand design, illustration, etc).

Tools i use Sketch as my main design tool now but past there i was using photoshop as my main design tool but time and speed and usability changed so i really love using sketch and I right about every day and encourage my friends to start using it but i use some tools that help me a lot beside sketch such as adobe illustrator is very good with vector drawing and imageOptim to compress images and photoshop still using it for image editing only and i use origami and adobe XD for prototype and my main prototype tool now is invision because i can get feedback really easily and I can update very easily also. Ops there is more.
